+91 97436 16111 | shriyaditasrinivaas10@gmail.com | linkedin.com/in/shriyadita-srinivaas | github.com/ShriyaditaSrinivaas

TECHNICAL SKILLS

Languages: Python, C/C++, SQL, Java, JavaScript

Frameworks & Libraries: PyTorch, TensorFlow, Keras, Hugging Face, Scikit-learn, NumPy, Pandas, OpenCV

GenAI & LLMs: LangChain, LangGraph, AWS Bedrock (Claude Sonnet 4, Amazon Nova), RAG Pipelines, Prompt

Engineering, Guardrails, Evaluation Frameworks

Cloud & Tools: AWS (Lambda, S3, Redshift, Glue, Athena), Snowflake, Docker, Git, React.js, Django, Streamlit

PROFESSIONAL EXPERIENCE

Machine Learning Intern

May 2025 – May 2026

Bengaluru, India | Indegene Pvt Ltd

- Designed and deployed 3 GenAI healthcare use cases to production on AWS Bedrock (Claude Sonnet 4, Amazon Nova), achieving avg evaluation score of **0.87** across 9 metrics (**Relevance 0.94, Coherence 0.94, Faithfulness 0.88**) - all 3 live and serving pharmaceutical clients
- Built a scalable multi-model LLM routing system integrating RAG, guardrails, Lambda, S3, Snowflake, and Redshift, enabling pharmaceutical clients to query clinical and patient journey data via natural language in production
- Benchmarked Claude Sonnet 4 vs. GPT-4o-mini across **BLEU (0.77 vs. 0.72)** and **Rouge-L (0.82 vs. 0.80)** - Claude selected as production LLM; implemented feedback loops driving gains in **Recall (0.89)** and **Precision (0.89)**

Software Development Intern (Team Lead)

Mar. 2025 – May 2025

Remote | Bluestock Fintech (Early-Stage Fintech Startup)

- Appointed **Team Lead** among all interns; led daily standups, delegated tasks, and resolved technical blockers as the primary point of contact between the intern team and senior engineers
- Delivered a full-stack IPO tracking application using **React.js** and **Django** with RESTful APIs, integrating real-time stock market data for live IPO listings, mutual fund rates, and SIP updates

Data Analyst Intern

Sept. 2023 – Oct. 2023

Bengaluru, India | Indegene Pvt Ltd

- Built an automated Python scraping pipeline aggregating real-time vaccine availability from 4 major US retail chains (Walmart, Kroger, CVS, Target), cutting manual data collection time by **75%** with twice-daily reporting
- Analyzed geospatial vaccine distribution gaps for Pfizer's US Allocation Project, delivering stakeholder-ready reports that drove data-driven resource allocation for a **Fortune 500** pharmaceutical client

TECHNICAL PROJECTS

Polygenic Risk Score Engine | *PyTorch, DeBERTa-v3, BiLSTM, AWS Lambda, Streamlit*

Dec. 2024 – May 2025

- Developed a multi-output DL pipeline (DeBERTa-v3 + 3-layer BiLSTM) predicting 15 genetic traits on a **150GB** openSNP dataset (6,000+ genomes), achieving **87% accuracy, precision 0.84, recall 0.79, F1 0.81**; published at [IEEE ICSIoT 2025](#)
- Deployed serverless inference via AWS Lambda with custom RSID tokenization and allele dosage embeddings, processing **600K–1.2M SNP entries** per genome file on demand with user privacy controls

LANTERN: Disaster Response Platform | *Python, XGBoost, LangGraph, BLE Mesh, Flutter*

Jul. 2024

- Architected a 3-phase AI disaster response system using NER models, XGBoost demand forecasting, and a fairness-aware stable matching algorithm, achieving **zero redundant allocations** across 5 recipient zones and 4 resource categories; presented at WRFASE 2025
- Integrated **BLE Mesh** P2P networking enabling fully offline operation in infrastructure-compromised zones, extending usability to areas with no connectivity; implemented RAG via LangGraph for dynamic aid response

Indian Sign Language Translator | *PyTorch, YOLOv8, Hugging Face, OpenCV, Gradio*

Mar. – Jun. 2024

- Built a 2-stage pipeline fine-tuning **YOLOv8m** (detection, **mAP50 ~0.99, mAP50-95 ~0.90**, 11K images) and YOLOv8l (classification, **mAP50 ~0.99, mAP50-95 ~0.90**, 9K images) across 36 ISL sign classes, expanding accessibility for **63M+** deaf and hard-of-hearing individuals
- Integrated Indictrans2 (200M params) for sign-to-text translation across all 22 scheduled Indian languages and Bark neural TTS for multilingual speech synthesis on **NVIDIA Tesla T4**

EDUCATION

M.S. Ramaiah Institute of Technology

2021 – 2025

Bengaluru, India | B.E. in Computer Science & Engineering (AI & ML) | GPA: 3.33/4.0 (Final Year: 4.0/4.0)

- Relevant Coursework:** Machine Learning, Deep Learning, Computer Vision, Artificial Intelligence, Big Data Analytics, Information Retrieval

ACHIEVEMENTS & RECOGNITION

- #1 in Bangalore City** – Amazon ML Challenge 2024 | **Finalist** – SAP India Hackathon 2024 | **Semi-Finalist** – Smart India Hackathon 2023
