Bengaluru, India | +91 97436 16111 | shriyaditasrinivaas10@gmail.com | linkedin.com/in/shriyadita-srinivaas | github.com/ShriyaditaSrinivaas

EDUCATION

M.S. Ramaiah Institute of Technology

2021 – 2025

Bengaluru, India | B.E. in Computer Science & Engineering (AI & ML)

- **Coursework:** Artificial Intelligence, Machine Learning, Deep Learning, Computer Vision, Information Retrieval, Big Data Analytics

TECHNICAL SKILLS

Languages: Python, C/C++, SQL, Java, JavaScript, HTML/CSS

Frameworks & Libraries: PyTorch, TensorFlow, Keras, Hugging Face, NumPy, Pandas, OpenCV, Scikit-learn, LangChain, LangGraph

GenAI & LLMs: LLMs, RAG Pipelines, AWS Bedrock (Claude Sonnet, multimodal), Prompt Engineering, Guardrails, Evaluation Frameworks

Cloud & Tools: AWS (Lambda, S3, Redshift, Bedrock, Glue, Athena), Snowflake, Docker, Git, Streamlit, React.js, Django

PROFESSIONAL EXPERIENCE

Machine Learning Intern

May 2025 – Present

Bengaluru, India | Indegene Pvt Ltd

- Engineered and benchmarked RAG pipelines for GenAI healthcare use cases across 9 metrics including Relevance (0.94), Coherence (0.94), and Faithfulness (0.88) using Claude Sonnet 4, achieving avg score of 0.87
- Claude Sonnet 4 outperformed GPT-4o-mini on BLEU (0.77 vs. 0.72) and Rouge-L (0.82 vs. 0.80), demonstrating superior summarization capability for clinical content
- Designed scalable multi-model LLM architecture on **AWS Bedrock** integrating RAG, guardrails, Lambda, S3 presigned URLs, Snowflake, and Redshift for end-to-end secure, auditable healthcare data workflows
- Implemented feedback loops across all GenAI use cases, driving measurable gains in Recall (0.89) and Precision (0.89)

Software Development Intern (Team Lead)

Mar. 2025 – May 2025

Remote | Bluestock Fintech

- Appointed Team Lead among all interns; conducted daily standups, assigned tasks, and resolved technical blockers across all development phases as primary point of contact for senior engineers
- Built full-stack **IPO tracking application** using React.js and Django, implementing RESTful CRUD viewsets and validating all API endpoints via Postman
- Delivered real-time stock market data integration for live IPO listings, mutual fund rates, and SIP updates dynamically reflecting market fluctuations for end users

Data Analyst Intern

Sept. 2023 – Oct. 2023

Bengaluru, India | Indegene Pvt Ltd

- Engineered automated Python pipeline to scrape and compile real-time vaccine availability from Walmart, Kroger, CVS, and Target – enabling twice-daily reporting with zero manual effort
- Delivered structured geospatial insights for Pfizer's US Allocation Project, identifying vaccine distribution gaps to support data-driven healthcare resource planning
- Reduced manual data collection time by **75%** while delivering stakeholder-ready reports for a Fortune 500 pharmaceutical client

RESEARCH PUBLICATIONS & PRESENTATIONS

“A Serverless Deep Learning Framework for Genetic Trait and Risk Analysis” – IEEE Xplore

Dec. 2025

- Published at 3rd International Conference on Intelligent Cyber Physical Systems and IoT; proposed DeBERTa-v3 + BiLSTM pipeline achieving **87% accuracy**, precision 0.84, recall 0.79 on 150GB genomic dataset (6,000+ genomes)

“A Multiphase Disaster Management Algorithm” – WRFASE International Conference

Aug. 2025

- Presented LANTERN framework with XGBoost resource forecasting, graph-based community detection, and federated learning for privacy-preserving post-disaster refinement

TECHNICAL PROJECTS

Polygenic Risk Score Engine | PyTorch, DeBERTa-v3, BiLSTM, AWS Lambda, Streamlit

Dec. 2024 – May 2025

- Engineered multi-output DL pipeline (DeBERTa-v3 + 3-layer BiLSTM) predicting 15 genetic traits; achieved **87% accuracy** and $F1 > 85\%$ on 6,000+ genomes with on-demand inference via AWS Lambda
- Implemented custom RSID tokenization with allele dosage embeddings; built Streamlit + S3 UI with user privacy controls processing 600K–1.2M SNP entries per genome file

LANTERN: Disaster Response Platform | Python, XGBoost, LangGraph, BLE Mesh, Flutter

Jul. 2024

- Built 3-phase disaster response system with NER/classification AI models, XGBoost demand forecasting, and BLE Mesh P2P networking for offline operation in infrastructure-compromised zones

- Designed fairness-aware stable matching algorithm for aid allocation; integrated RAG via LangGraph for dynamic response across 5 recipient zones and 4 resource categories with zero redundant allocations

Indian Sign Language Translator | *PyTorch, Hugging Face, OpenCV, Gradio*

Mar. – Jun. 2024

- Fine-tuned YOLOv11 for real-time ISL hand detection and Indictrans2 transformer for sign-to-text translation across all 22 scheduled Indian languages, enabling accessibility for 63M+ deaf and hard-of-hearing individuals
- Deployed multimodal end-to-end pipeline with Bark neural TTS for natural-sounding speech synthesis in English and regional languages on NVIDIA Tesla T4 GPU

ACHIEVEMENTS

- **#1 in Bangalore City** – Amazon ML Challenge 2024
- **Finalist** – SAP India Hackathon 2024
- **Semi-Finalist** – Smart India Hackathon 2023
